RESEARCH EXPERIENCE

CraGL Lab, George Mason University

Graduate Student Research Assistant

Fairfax, VA

Sept. 2021 - Present

- **HandMade**: Developed a VR authoring system that helps users turn their creative ideas into 3D assets through rough sketches and language, reducing the need for detailed manual modeling.
- **ShapeSonic**: Developed a nonvisual interface that helps blind and visually impaired users explore and understand 3D shapes by translating fingertip interactions with surface geometry into real-time auditory feedback.

Adobe Research

Research Intern

Seattle, WA

May 2024 - Aug. 2024

- **MoSound**: Developed a sound-authoring interface for motion graphics, integrating visual event detection, motion-to-sound mappings, and generative synthesis; informed the design through formative studies and user evaluation.
